AI Security Shield

Business and Enterprise licenses

Activation guide

1. Install AI Security Shield from the Chrome Web Store: https://chromewebstore.google.com/detail/hnhbloimhbjkllldaacjgencadbphdhgi
2. Click the puzzle icon next to the address bar and pin AI Security Shield so its shield icon is always visible.
3. Click the shield icon, then open Options and choose the Licence tab.
4. Paste your license key into the Licence key field.
5. Click Activate.
6. Check the result: the plan shows Business (or Enterprise) and the monthly limit is gone.
7. Using it on more computers? Repeat these steps on each one; every browser takes one seat. If you replace a computer, remove the licence from the old one first to free up its seat.
8. Need help? Write to us at info@ai-protektor.com and include the last five characters of your key.

Good to know: masking runs entirely on your computer. The license server only sees the license key, a random browser ID, the extension version and the language.
